

**US Army Corps
of Engineers®**

Kansas City District

focusing on the future

Environmental Careers Available

- Positions available in hazardous waste remediation for recent graduates in the following areas:
 - Environmental Engineering
 - Chemical Engineering
 - Civil Engineering
 - Geotechnical Engineering
 - Geology
- The Kansas City District is an organization of approximately 800 employees based in Kansas City, Missouri with field offices in Kansas (Fort Leavenworth, Fort Riley, and McConnell AFB) and Missouri (Whiteman AFB and Fort Leonard Wood)
- The Kansas City District Hazardous, Toxic & Radioactive Waste (HTRW) program is a diverse group of technical professionals specializing in environmental restoration of Formerly Used Defense Sites (FUDS), active Army installations, and US Environmental Protection Agency (EPA) Superfund sites
- Our employees are involved in every phase of the project, including: conceptualization, investigation, design, technical review, construction, and operation
- You do not have to join the Army – 98% of Corps employees are civilians
- Recent graduates typically have the opportunity to experience rotational work assignments in Civil Works, Military design and Construction programs for a period of 1 or 2 years to get comprehensive exposure to our diverse projects
